Gold Medal Tools

AT THE PAN-AMERICAN EXPOSITION

Two Gold Medals—the highest award—for general excellence of Machine Tools have just been awarded us at the Pan-American Exposition, Buffalo, in the face of competition unequalled at any other exhibit of this nature.

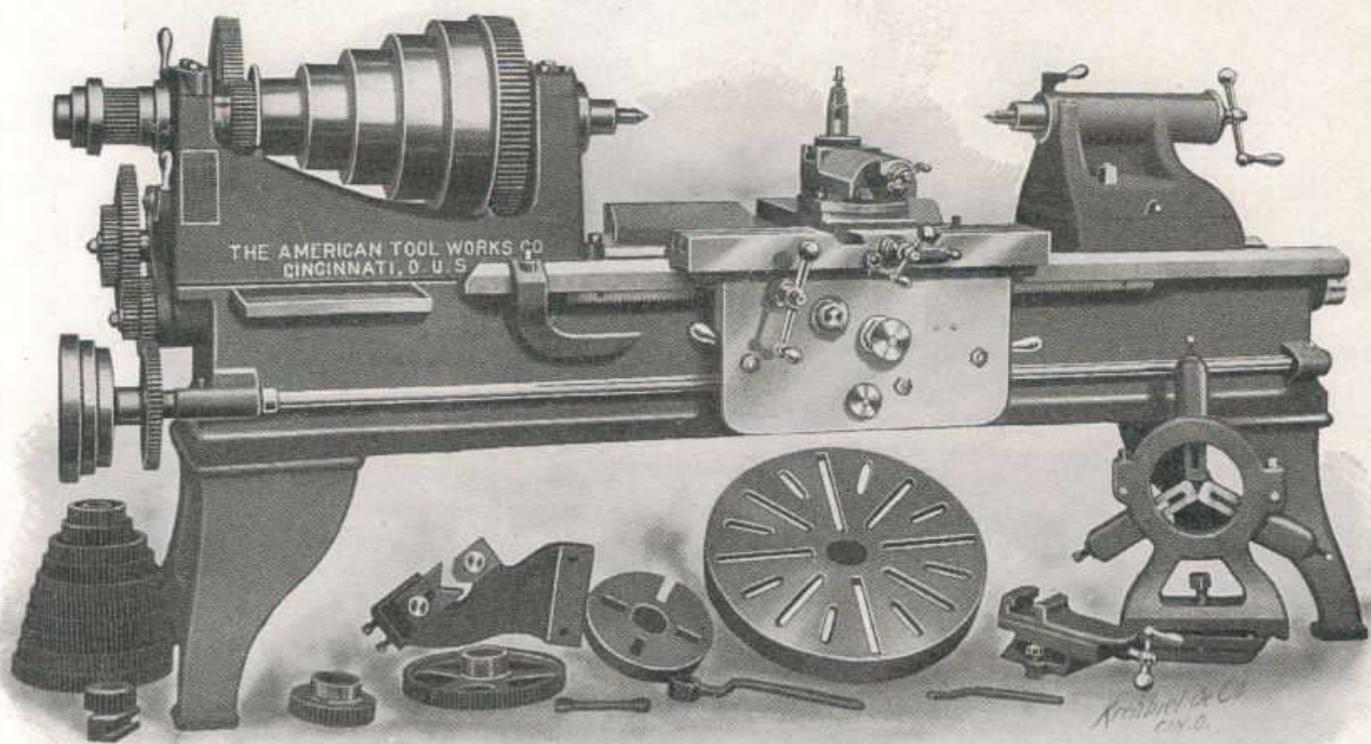

We are proud of this success and believe it not amiss to show our friends, by illustration, a few samples of the kind of work which has been the means of our attaining it.

The pictures in this little book do not represent nearly all we make, but will, we hope, serve their purpose by showing in our tools what we always claim for them—the greatest excellence in design, material, and workmanship.

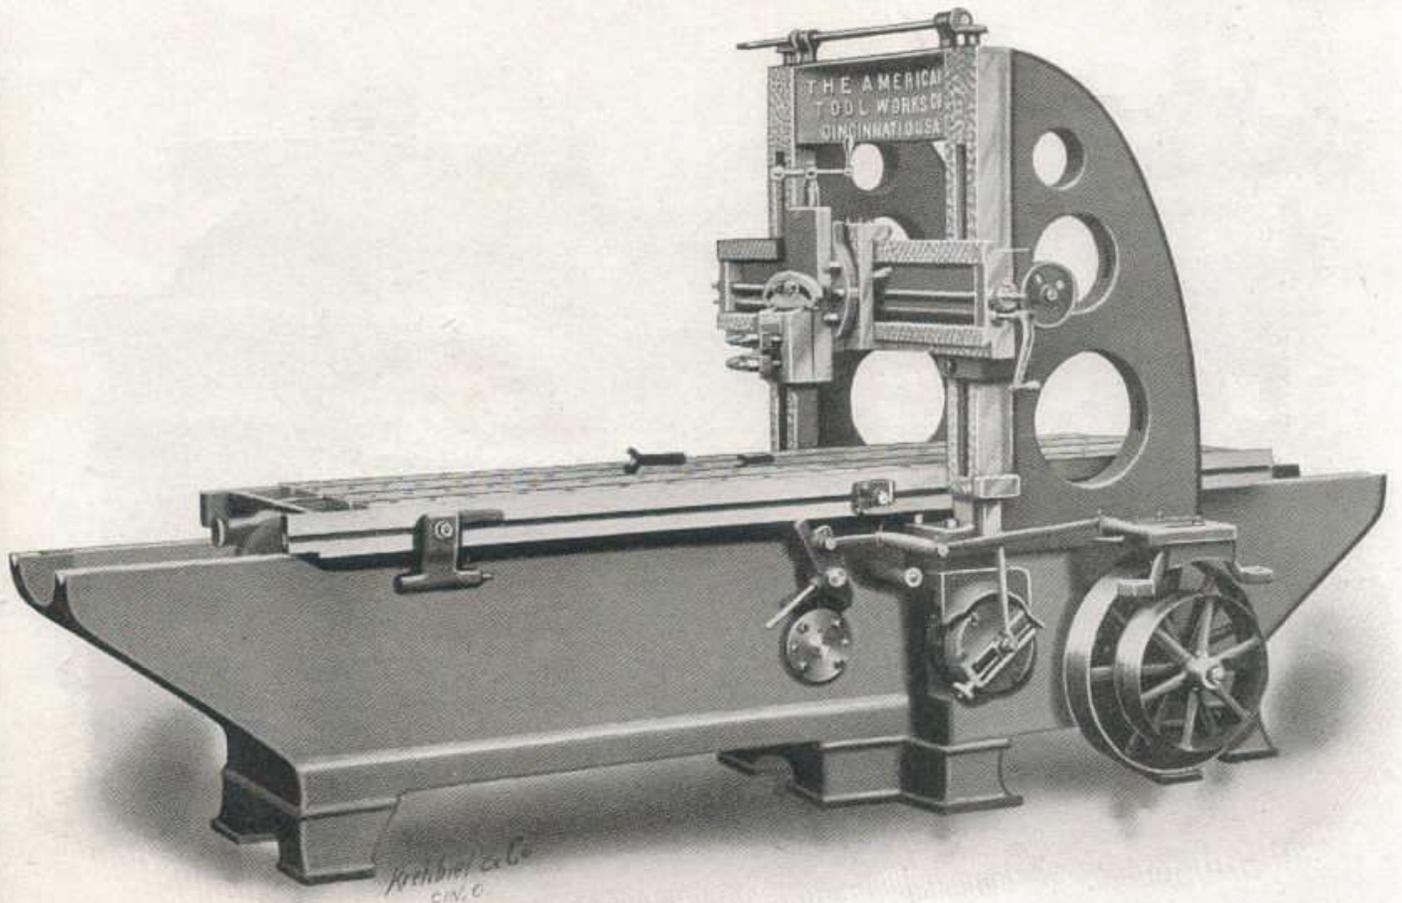

The American Tool Works Company.

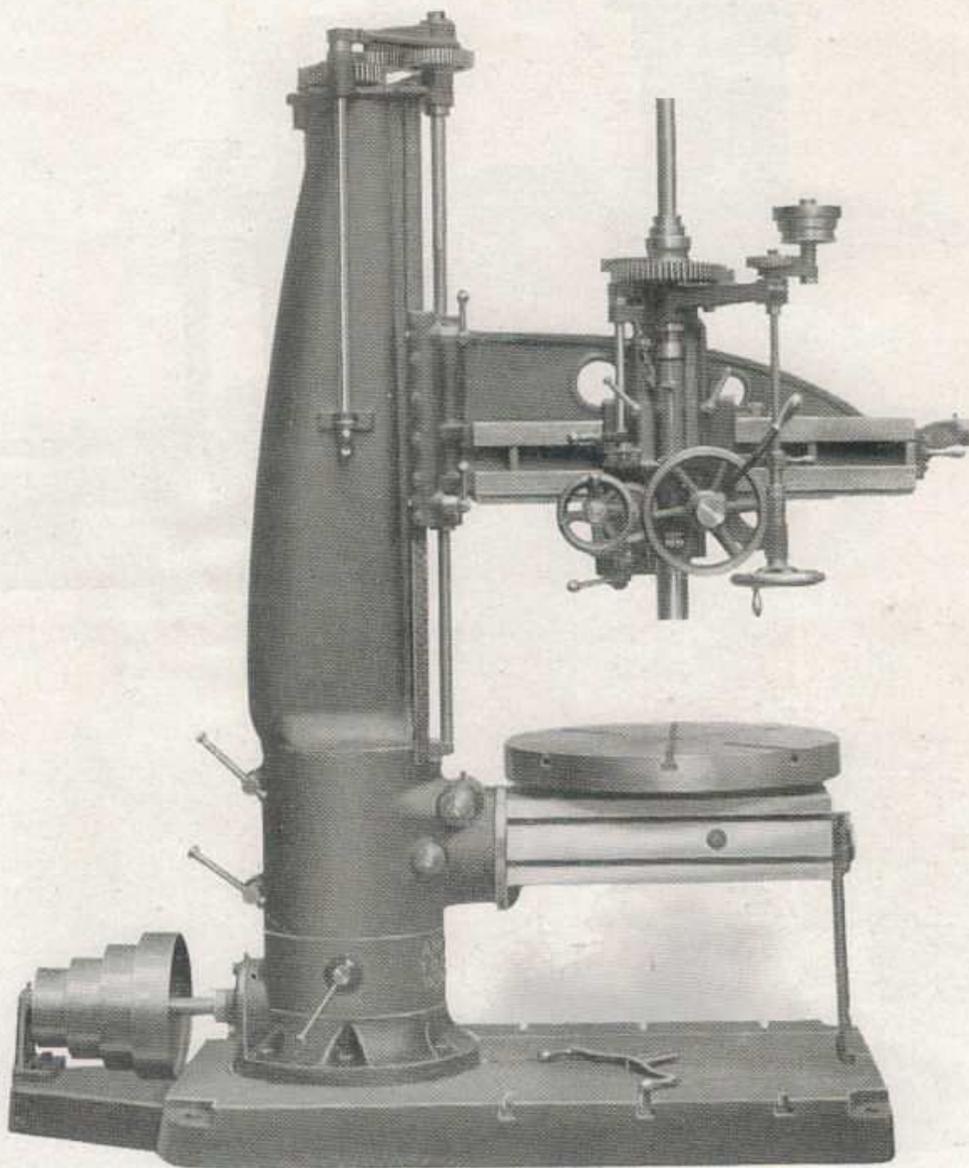

14" Challenge Tool-Room Lathe.

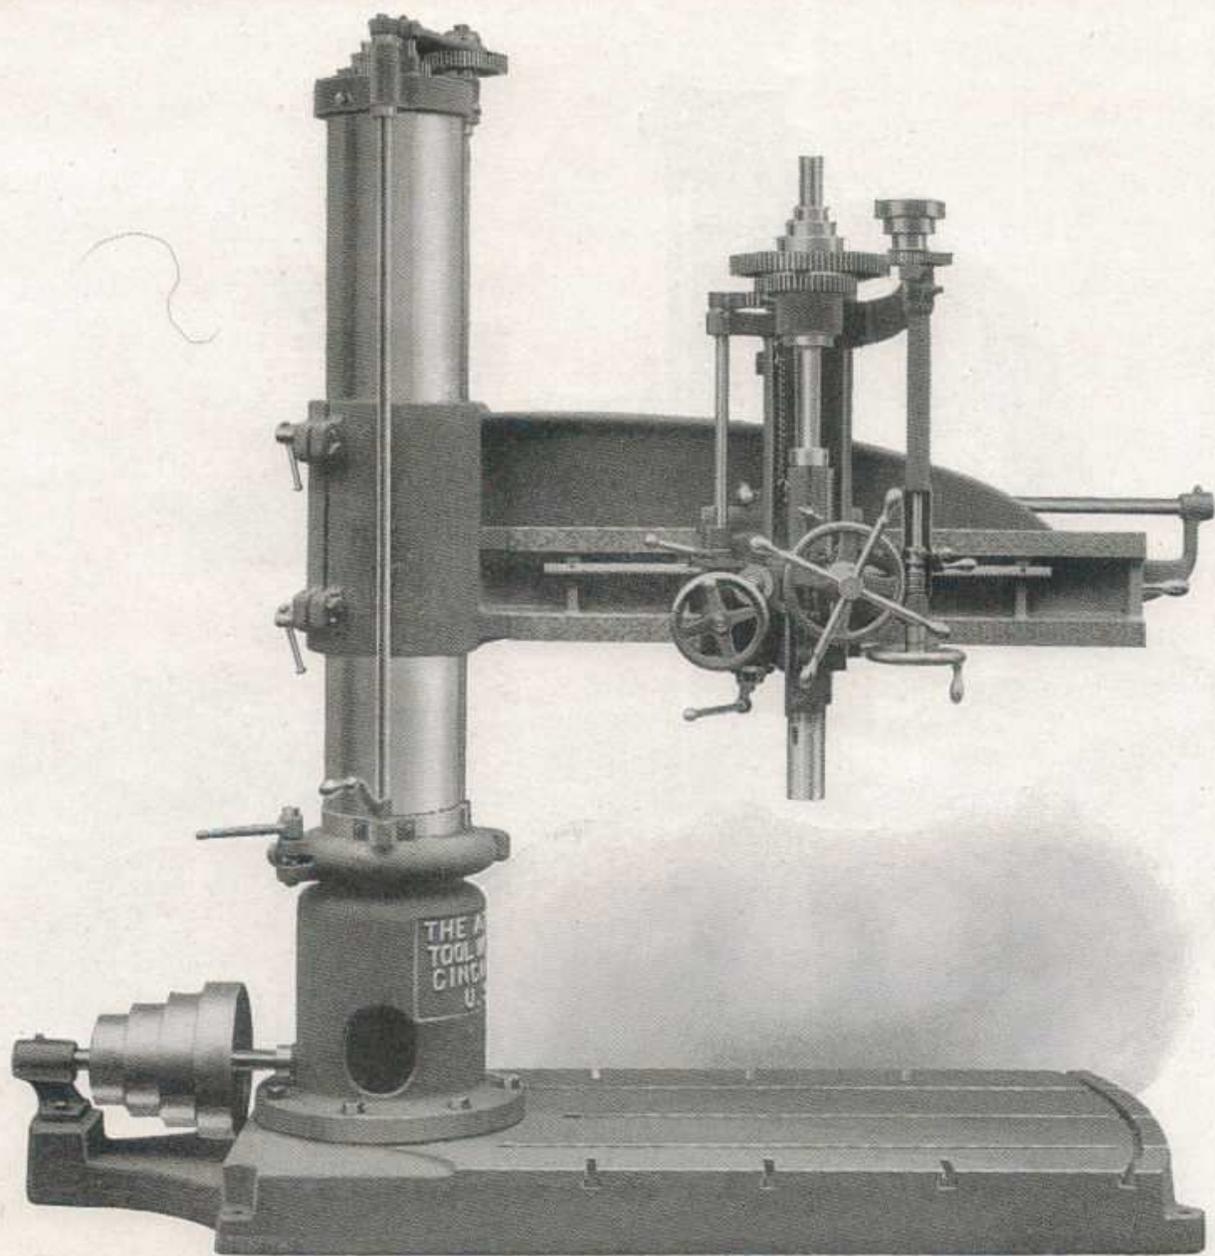

22" Standard Engine Lathe.

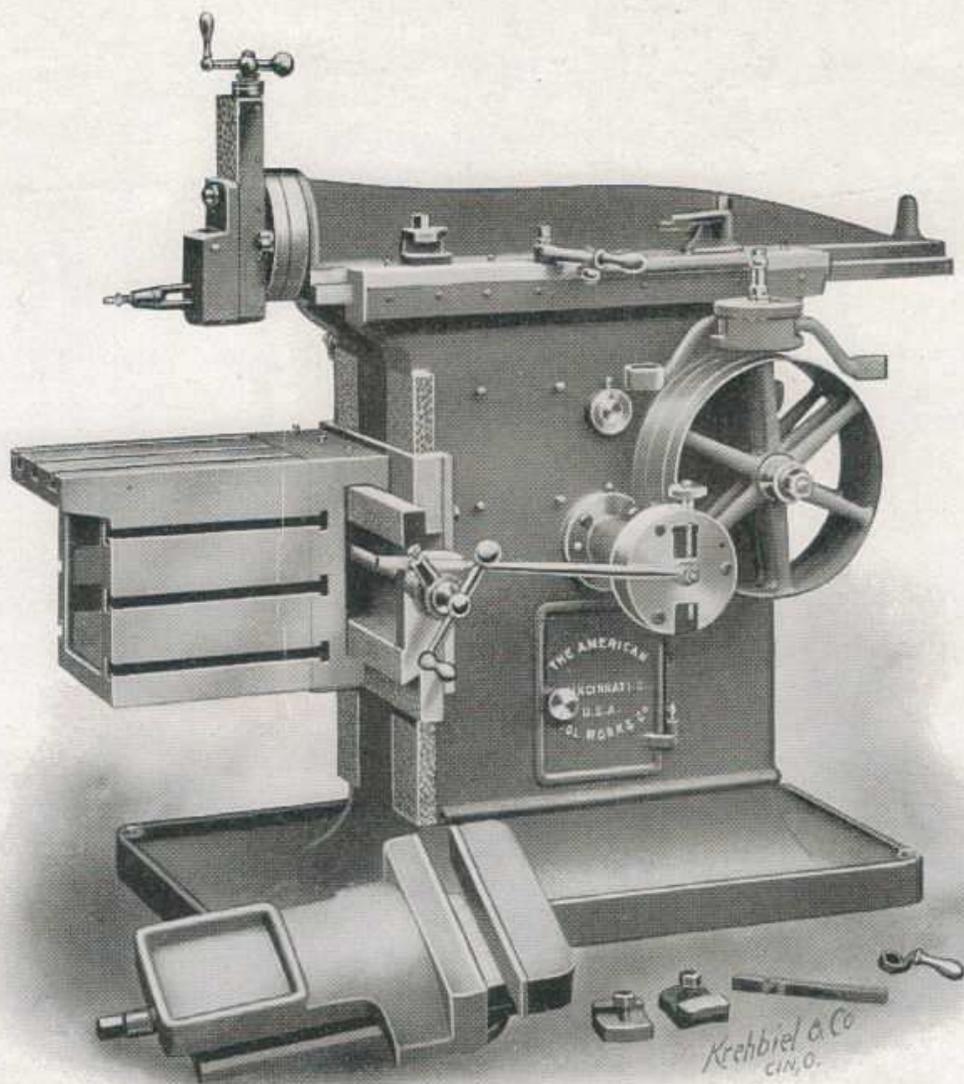

30" x 30" Iron Planer.

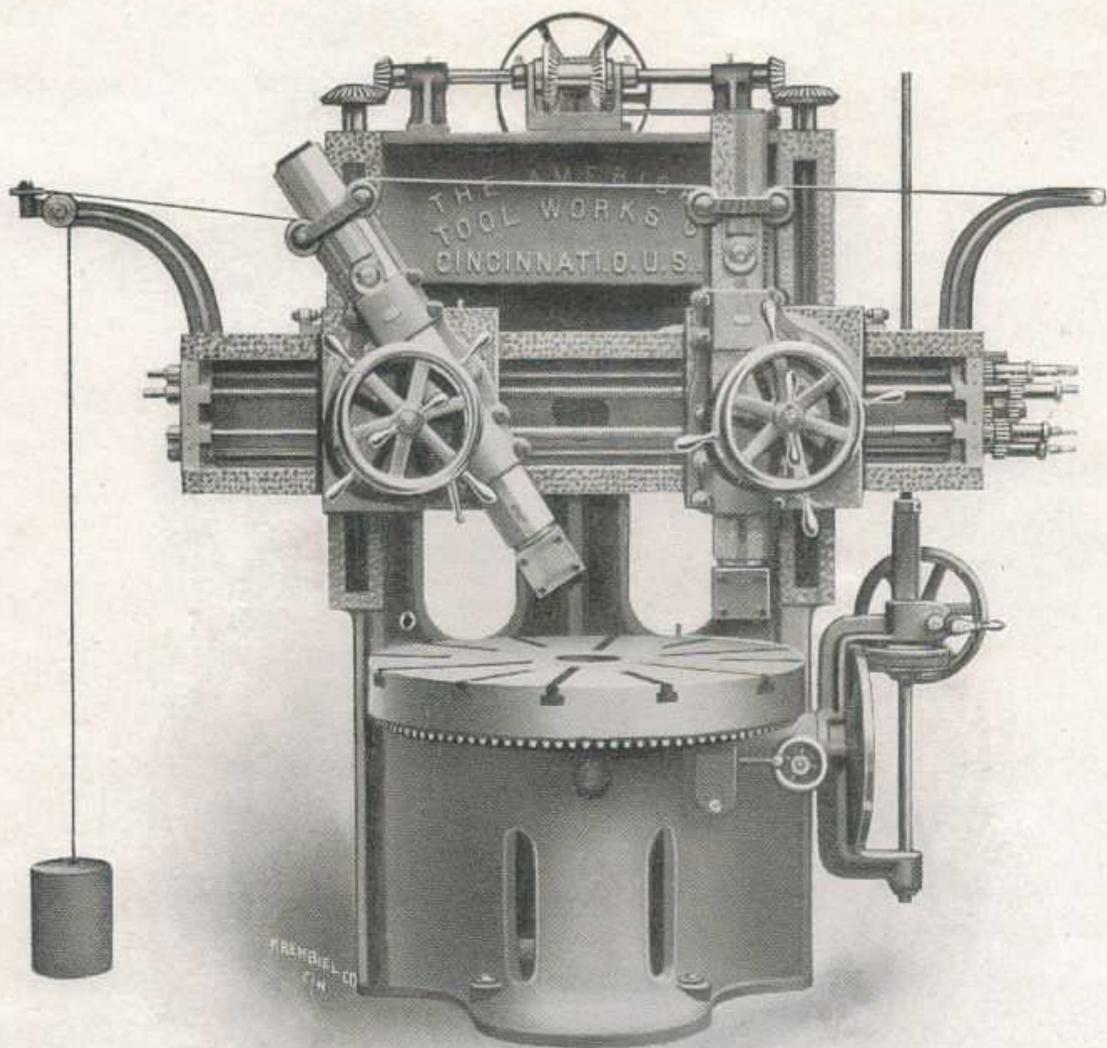

2½' American Radial Drill.

5' American Radial Drill—Plain.

28" Triple-Geared Shaper.

37" Boring and Turning Mill.
